

REMARKS

The present Preliminary Amendment is submitted to provide the requisite cross-reference to the parent application on page 1 of the specification. Also, the specification and abstract are amended in a manner similar to that in the parent application Serial No. 10/154,920, and thereby to place the case in better condition for examination.

Respectfully submitted,

Tomotaka YAGI et al.

Amendments to the Abstract

Please amend the original abstract (page 71) as follows:

ABSTRACT OF THE DISCLOSURE

A recordable optical disc stores one or more video objects. A video stream, a first audio stream, and a second audio stream which is used for dubbing are multiplexed into each video object. Also, an optical disc recording apparatus generates the second audio stream by an audio stream generating device means, and multiplexes the generated second audio stream into each video object together with the video object and the first audio stream by a ~~multiplexing means~~ multiplexor. The generated video objects are recorded onto the recordable optical disc by a recording device means. The optical disc in which such video objects are stored facilitates dubbing.
